

## ♥ DIRECTIONS FOR USE

For all illnesses, the recommended dosage is six squirts under the tongue, once per hour. Do this every hour until symptoms are alleviated.

ViraFungal Fighter may taste bitter at first. A bitter taste indicates the presence of infection. It becomes less so as the body heals and is rid of bacterial and viral organisms.

If you are allergic to extracts of grape seed or grapefruit seed, then do not use in eyes, nose, ears or mouth.

Take ViraFungal Fighter with you when you travel. It prevents diarrhea and protozoan infections. Treat the water before drinking. Sterilize, sanitize and disinfect any surface to prevent illness and infections.

Although for a healthy body there are no side effects associated with grape seed and grapefruit seed extracts, when they are used to treat a long-term, serious illness, the body may react with symptoms such as headaches, rashes, fatigue, diarrhea, muscle aches, joint pain, and swelling of the mouth, throat, sinuses, and lymph-nodes. In other words, the seriously ill body may react with flu-like symptoms. These are signs that the body is purging and recovering from illnesses, as toxins and invading microbes are removed. Drinking plenty of water and/or reducing the intake of ViraFungal Fighter will minimize this Flu-like effect. Your body will feel fantastic after the cleansing!

**INGREDIENTS:** Distilled Water, Grape Seed Extract, Grapefruit Seed Extract, Vegetable Glycerine.

A Cruelty-Free Product.

*Danielle's canine companion, Mon Cheri, says, "My mom sprays ViraFungal Fighter on my gums and teeth to prevent gingivitis and in my eyes to keep them nice and clear. Twice a week she sprays it on my tongue to kill parasites. When I have an itchy red spot, my mom sprays ViraFungal Fighter on my skin, and Voila! No more itch!"*

Grape Seed and  
Grapefruit Seed Extract

## Grape Seed and Grapefruit Seed Extract

In a world where drugs are increasingly becoming ineffective for many types of microorganisms, the benefits of natural supplements are becoming more important. Virafungal Fighter provides many advantages over the use of synthetic antibiotics. It remains effective over time with continued use against viruses and bacteria that have developed resistances to antibiotics and it does not upset the natural balance of good bacteria in the intestines. Combined, these natural and non-toxic compounds form one powerful, comprehensive health supplement and a completely natural and organic holistic natural medicine.

### ♥ THE SECRET OF YOUTHFULNESS

Youthfulness, to a great extent, is determined by the suppleness of the connective tissues in the body. In our youth these tissues are soft, pliant and flexible. As we age, the production of antioxidant enzymes in the body decreases. These tissues oxidize, become stiff and lose their elasticity. The skin becomes leathery; arteries harden; eyes become cloudy. The powerful antioxidants in Virafungal Fighter can deactivate free radicals and stop the damage they cause. It can help protect the skin from ultraviolet radiation damage that leads to wrinkles and skin cancer.

- ♥ **SKIN:** Skin problems caused by bacteria, including acne, dermatitis, impetigo, shave itch, cracked lips and even basic cuts and wounds, can be treated with Virafungal Fighter.
- ♥ **HEART:** It even fights cardiovascular disease by stopping the oxidation of LDL cholesterol, which causes hardening of the arteries. It helps lower blood pressure and prevent blood clots and strokes.
- ♥ **CANCER:** Virafungal Fighter fights cancer, although it is not a cure.
- ♥ **TEETH:** It fights tooth decay and gum disease.
- ♥ **EYES:** These natural extracts prevent free-radical damage to the lens and retina of the eye, and even treat glaucoma by protecting collagen structures in the eye.
- ♥ **LUNGS:** Virafungal Fighter helps relieve asthma and emphysema.
- ♥ **BRAIN:** Daily use improves brain function and relieves depression.
- ♥ **STOMACH:** Ulcers related to excessive secretion of histamine in the stomach lining can be treated with Virafungal Fighter.

♥ **ANTIOXIDANT:** Grape and Grapefruit Seed Extract contain bioflavonoid complexes that are 20 times more potent than Vitamin C and 50 times more potent than Vitamin E as an antioxidant. Bioflavonoids are essential antioxidants that our bodies cannot make, but we cannot survive without them. Many signs of aging, such as arthritis, hardening of the arteries, cataracts, glaucoma, degeneration of visual acuity, periodontal disease, and even some types of cancer are merely signs of a deficiency in bioflavonoids. They strengthen connective tissues throughout the body, especially joints, blood vessels and skin.

♥ **ANTIBIOTIC:** The advantage of using Virafungal Fighter instead of prescription antibiotics is that Virafungal Fighter doesn't upset the natural balance of good bacteria in the intestines. It is a top microbe killer against Candida, Staph, Salmonella, Strep, and E. coli, beating out iodine, chlorine bleach, tea tree oil and colloidal silver! Virafungal Fighter also provides powerful protection against 800 bacterial and viral organisms as well as 100 strains of fungus and a large number of single cell and multi-cell parasites.

♥ **ANTI-INFLAMMATORY:** The ingredients in Virafungal Fighter are the most potent antioxidant free radical deactivators ever discovered. They fight inflammation by binding to connective tissue of joints, preventing swelling, helping heal damaged tissue, and lessening pain.

♥ **ANTIHISTAMINE:** The anti-allergenic and antihistamine action prevents the reaction to pollens and food allergens.

♥ **NON-TOXIC:** Grape Seed and Grapefruit Seed extracts have been laboratory tested to be non-toxic and safe for humans and animals.

### ★ ANTIMICROBIAL PRESERVATIVE EFFECTIVENESS VALIDATION TEST ★

The antimicrobial preservative properties present in the sample (4 x 2 fl. oz. Virafungal Fighter) can be neutralized under the test conditions described below:

Test Microorganism	Diluent	Dilution	Inoculum CFU/plate	Microbial Recovery CFU/plate	Percent Recovery	Initial Inoculum/gm	CFUs/gm 14 Days	CFUs/gm 28 Days	Log Reduction from Initial Inoculum 14 Days	Log Reduction from Initial Inoculum 28 Days
Aspergillus niger (mold)	DNB	1:10	46	39	85	1.3E6	3.3E3	2.2E3	2.6	2.8
Candida albicans (yeast)	DNB	1:10	48	48	100	3.3E5	<10	<10	4.5	4.5
Escherichia coli (bacteria)	DNB	1:10	42	41	98	2.7E6	<10	<10	5.4	5.4
Pseudomonas aeruginosa (bacteria)	DNB	1:10	26	25	96	2.4E6	<10	<10	5.4	5.4
Staphylococcus aureus (bacteria)	DNB	1:10	31	22	71	2.9E6	<10	<10	5.5	5.5

Note: Numbers in the report such as 2.3E5 are an alternate exponential format for  $2.3 \times 10^5$ . CFU = Colony Forming Units. Plating media: Microbial Content Test Agar (Bacteria), Sabouraud Dextrose Agar (Yeast and Mold). The above test results meet the current USP Category 2 Criteria of Acceptance for the Antimicrobial Preservative Effectiveness Test. BioScreen Testing Services • F.D.A. Registered • California State Certified • D.E.A. Registered.
