

♥ DIRECTIONS FOR USE

If your pet is allergic to grape or grapefruit seed extracts, do not use in eyes, nose, ears or mouth.

For earaches, sinus and eye infections, three sprays as needed will work wonders. You can spray it in your pet's mouth up to 12 squirts at a time, morning, noon and night. Make sure your pet has plenty of fresh water to drink.

You can spray it on dogs and cats for gingivitis, eye infections and parasites. Spray it on birds' feathers to get rid of infections and itching. Spray into fish tanks to kill microorganisms.

INGREDIENTS: Distilled Water, Grape Seed Extract, Grapefruit Seed Extract, Vegetable Glycerine.

A Cruelty-Free Product.

♥ TESTIMONIALS

"I was introduced to Danielle L'Don's natural products by a co-worker about a month ago. I have a 18 years old dog, she has been having some health issues, in fact last year we thought we would have to put her to sleep. I started spraying my dog with ViraFungal Fighter, she looks younger, she is more energized, it's done miracles on her. Also - my family and myself have been using ViraFungal spray for acne, skin irritations, teeth, etc. We are very satisfied with the results." -- Anna Burgos

"I use the ViraFungal Fighter as a body deodorant, to clear my sinuses, and to ward off ear infections. I used the product on a bug bite and within five minutes the itching stopped and the swelling and redness went away. Thank you Danielle." -- S.Y. Lee

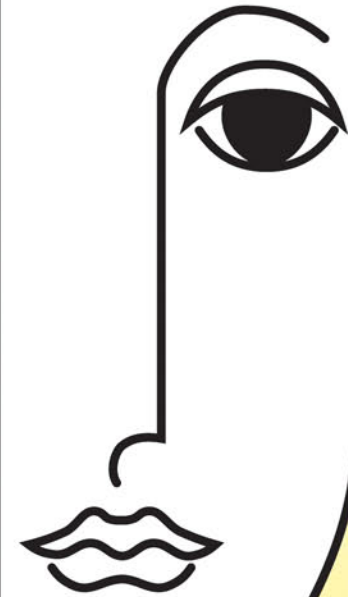

Danielle's canine companion, Mon Cheri, says, "My mom sprays ViraFungal Fighter on my gums and teeth to prevent gingivitis and in my eyes to keep them nice and clear. Twice a week she sprays it on my tongue to kill parasites. When I have an itchy red spot, my mom sprays ViraFungal Fighter on my skin, and Voila! No more itch!"

DANIELLE L'DON

ViraFungal Fighter™

Grape Seed and
Grapefruit Seed Extract

Grape Seed and Grapefruit Seed Extract

"My ViraFungal Fighter is fabulous for inside as well as outside your pet's body. It will help get rid of bacterial, eye, ear and throat infections, parasites, nail fungus, and more. You can spray it on your pet's skin for cuts, burns, rashes, and 'hot spots.' Within seconds, the pain disappears!

"You and your pet have a vital need for antioxidants to maintain the immune system and produce new healthy cells. Many strains of pathogenic microbes (viruses, fungi, bacteria or any other single-celled pathogens) that are resistant to other antibiotics are killed on contact by ViraFungal Fighter and are unable to mutate. However, it does not harm tissue cell enzymes or friendly bacteria. Vegetable glycerine binds the extracts to the tissues to increase the availability of the Grape Seed and Grapefruit Seed extracts to the body.

"My natural topical antibiotic formula relieves skin conditions on pets such as cuts, scrapes, burns, rashes and fungus between the toes. My soothing ViraFungal Fighter gets rid of ringworm, itching from irritated or inflamed skin due to insect bites or dry skin. It kills bacteria, fungi, and viruses as it penetrates, seals and protects without stinging. Great for human skin problems, too! You will be amazed at the results!"

- ♥ **SKIN:** Skin problems caused by bacteria, even basic cuts and wounds, can be treated with ViraFungal Fighter.
- ♥ **CANCER:** ViraFungal Fighter fights cancer, although it is not a cure.
- ♥ **TEETH:** It fights tooth decay and gum disease.
- ♥ **EYES:** These extracts prevent free-radical damage to the lens and retina of the eye, and even treat glaucoma by protecting collagen structures in the eye.
- ♥ **LUNGS:** ViraFungal Fighter helps relieve asthma and emphysema.
- ♥ **BRAIN:** Daily use improves brain function.

♥ **ANTIOXIDANT:** Grape and Grapefruit Seed Extract contain bioflavonoid complexes that are 20 times more potent than Vitamin C and 50 times more potent than Vitamin E as an antioxidant. Bioflavonoids are essential antioxidants that our bodies cannot make, but we cannot survive without them. Many signs of aging, such as arthritis, hardening of the arteries, cataracts, glaucoma, degeneration of visual acuity, periodontal disease, and even some types of cancer are merely signs of a deficiency in bioflavonoids. They strengthen connective tissues throughout the body, especially joints, blood vessels and skin.

♥ **ANTIBIOTIC:** The advantage of using ViraFungal Fighter instead of prescription antibiotics is that ViraFungal Fighter doesn't upset the natural balance of good bacteria in the intestines. It is a top microbe killer against Candida, Staph, Salmonella, Strep, and E. coli, beating out iodine, chlorine bleach, tea tree oil and colloidal silver! ViraFungal Fighter also provides powerful protection against 800 bacterial and viral organisms as well as 100 strains of fungus and a large number of single cell and multi-cell parasites.

♥ **ANTI-INFLAMMATORY:** The ingredients in ViraFungal Fighter are the most potent antioxidant free radical deactivators ever discovered. They fight inflammation by binding to connective tissue of joints, preventing swelling, helping heal damaged tissue, and lessening pain.

♥ **ANTIHISTAMINE:** The anti-allergenic and antihistamine action prevents the reaction to pollens and food allergens.

♥ **NON-TOXIC:** Grape Seed and Grapefruit Seed extracts have been laboratory tested to be non-toxic and safe for humans and animals.

★ **ANTIMICROBIAL PRESERVATIVE EFFECTIVENESS VALIDATION TEST** ★

The antimicrobial preservative properties present in the sample (4 x 2 fl. oz. ViraFungal Fighter) can be neutralized under the test conditions described below:

Test Microorganism	Diluent	Dilution	Inoculum CFU/plate	Microbial Recovery CFU/plate	Percent Recovery	Initial Inoculum/gm	CFUs/gm 14 Days	CFUs/gm 28 Days	Log Reduction from Initial Inoculum	
									14 Days	28 Days
Aspergillus niger (mold)	DNB	1:10	46	39	85	1.3E6	3.3E3	2.2E3	2.6	2.8
Candida albicans (yeast)	DNB	1:10	48	48	100	3.3E5	<10	<10	4.5	4.5
Escherichia coli (bacteria)	DNB	1:10	42	41	98	2.7E6	<10	<10	5.4	5.4
Pseudomonas aeruginosa (bacteria)	DNB	1:10	26	25	96	2.4E6	<10	<10	5.4	5.4
Staphylococcus aureus (bacteria)	DNB	1:10	31	22	71	2.9E6	<10	<10	5.5	5.5

Note: Numbers in the report such as 2.3E5 are an alternate exponential format for 2.3 x 10⁵. CFU = Colony Forming Units. Plating media: Microbial Content Test Agar (Bacteria), Sabouraud Dextrose Agar (Yeast and Mold). The above test results meet the current USP Category 2 Criteria of Acceptance for the Antimicrobial Preservative Effectiveness Test. BioScreen Testing Services • F.D.A. Registered • California State Certified • D.E.A. Registered.
